Policy

In accordance with section 4(1) of O. Reg. 31/24 made under the *Medical Radiation and Imaging Technology Act, 2017*, an applicant must have successfully completed a medical radiation and imaging technology program where the program is:

- i. offered at a Canadian institution, and was approved by Council or a body or bodies designated by Council for that purpose at the time the applicant successfully completed the program, or
- ii. subject to paragraph 5 of the same section, offered outside Canada and considered by the Registration Committee to be substantially similar to, but not equivalent to, a program described in subparagraph i.

Council has designated Accreditation Canada (the Approved Accreditation Body)¹ as the body for the purposes of subsection 4(1)(i).

For an educational program to be approved by the Approved Accreditation Body, it must be accredited (either with or without conditions).

While Council has the authority to approve educational programs offered at Canadian institutions for the purposes of subsection 4(1)(i), Council will not approve any educational program offered in Ontario that fails to achieve accreditation.

¹ Accreditation Canada, an affiliate of Health Standards Organization, was designated the Approved Accreditation Body as of February 1, 2018. Previous Approved Accreditation Bodies included the Conjoint Committee for the Accreditation of Educational Programs in Diagnostic Imaging and Medical Radiation Technologies of the Canadian Medical Association and 8872147 Canada Inc., a subsidiary of the Canadian Medical Association.

The attached Schedules set out those programs that are currently approved or were previously approved (either in regulation, by Council itself (through policy), and/or by an Approved Accreditation Body).

The Schedules are maintained by the Registrar, and Council authorizes the Registrar to amend the Schedules in the following circumstances.

1. If a new educational program in one of the specialties achieves accreditation with the Approved Accreditation Body, the name of the institution offering the program, its location, and its approval date will be entered. The approval date will be the date on which the College was advised of the program's accreditation by the Approved Accreditation Body.
2. If an educational program in one of the specialties that is listed in the Schedules either (a) loses its accreditation status with the Approved Accreditation Body or (b) withdraws itself from the Approved Accreditation Body, thereby ceasing to be an approved program for the purposes of registration with the College, a termination date will be entered. The termination date will be the date on which the College was advised of the program's status loss or withdrawal.
3. If there is a change to the name of the educational institution offering a program that is currently listed in the Schedules, the Registrar is to treat the program as if it were a new program and implement the necessary changes to the appropriate Schedule in accordance with (1) above.

Any other required amendments to the Schedules will be considered by Council.
